English (First)
Greek

PORTFOLIO

www.alexios.ca

Reddit Clone

React Native
- Learned full-stack development with React-Native front-end
  and python backend to create simple basic reddit clone with
  MongoDB

Mechanic Auto Shop

- Built web application using Next.js, mongoDB, nextAuth.js, and
  Shadcn-UI for a seamless and secure appointment requesting
  experience

Card Game (Online Multiplayer)

*- Designed and developed a multiplayer card game from the
ground up, featuring Unity Netcode integration and Steam
functionality*

Castle Mystery (NPC Interaction)

- An interactive FPS prototype where you can interact with your
  Environment, collect keys, unlock doors, read books, and talk to
  NPC's
- Learned to add user feedback with 3D audio, lighting, and
  interaction effects

2D Slime Game

- First big project where I learned pixel animations, sprites, and
  entity behaviours
- Very bad code in this project

EDUCATION

Langara College: BA of Science: Computer Science (Current)
